

KALAB TADESSE

SOFTWARE DEVELOPER

CONTACT

- +251953345801
- kalupt9999@gmail.com
- Niger Street, 4kilo, AA

PROJECTS

- Full project details available at:
 - <https://kalab-tadesse.vercel.app>
 - <https://github.com/kallSTONE>

TECHNICAL SKILLS

- Languages**
JavaScript, Python, Typescript, PHP, SQL, C++, C#, Java, Dart
- Frameworks**
React, Node.js, Next.js, MongoDB, Flutter
- Database and Backend**
Postgres, Supabase, Database Design
- Tools**
Git, GitHub, Figma, Notion, XAMPP

EDUCATION

ADDIS ABABA UNIVERSITY

- Bachelor of Science: Computer science
(Class of 2022/23)

CERTIFICATIONS & TRAINING

- Udacity - HTML,CSS, Javascript, Prompt Engineering
- FreeCodeCamp – JS DOM Manipulation, Web Frameworks
- 4K labs - Python Fundamentals

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Time Management
- Clear Communication
- Ownership & Responsibility

PROFILE

Software Developer with hands-on experience building production web applications, administrative systems, workflow platforms, and learning management solutions. Experienced in designing databases, implementing role-based access control, developing REST APIs, and building responsive user interfaces. Strong foundation in software engineering principles, problem-solving, debugging, and collaborative development. Passionate about learning new technologies and delivering reliable software that solves real business problems.

EXPERIENCE

WCU Software Developer Intern

2025 JUN - SEP

- Developed a responsive property rental web application using modern frontend practices with React/Next.js.
- Implemented dynamic data rendering by integrating REST APIs for real-time property and user data.
- Ensured consistent design system across pages with focus on usability and responsive layouts.
- Delivered production-ready features by collaborating closely with requirements and iterative feedback.

Private Client Website Developer

2025 NOV-2026 FEB

- Built a Learning Management System with role-based access (Admin, Student, Reviewer)
- Implemented course enrollment, quiz systems, completion-based content access, and automatic certification.
- Developed progress tracking dashboards for students and instructors
- Implemented secure authentication using Google OAuth (Google Console) and InfobipSMS for user sign-up and login

Nisir Choir Mobile App Developer (Adalo)

OCT 2025

- Designed user-friendly mobile interfaces for song creation and editing workflows.
- Built dynamic content screens adapting to user interaction and input.

Personal Website Developer

2024 NOV- 2025 NOV

- Designed session-based access control logic with differentiated usage limits for guest and authenticated users.
- Built an AI-powered admin assistant that auto-generates tool metadata and tool recommendation system based on categories and metadata.
- Integrated Microsoft Clarity analytics to track user behavior and optimize UI performance.
